MEMORANDUM FOR: Acting Deputy Director for Science and Technology
SUBJECT: ISINGLASS R&D Program

1. At the last EXCOM meeting Dr. Flax agreed to review the proposed ISINGLASS R&D program and to report his recommendations at the next meeting of EXCOM. In preparation, he visited McDonnell Aircraft Corporation at St. Louis on 7 September 1966, at which time he received a detailed briefing on the program [REDACTED]. At St. Louis he referred to his obligation to EXCOM and said he would have the report out in two to three weeks.

2. We are hopeful, therefore, that the forthcoming EXCOM meeting will see some decision on the proposed R&D program. McDonnell has now invested [REDACTED] in the ISINGLASS program and, more importantly, over two years time of some of its key technical and supervisory people. It is apparent to us that if a decision on the proposed R&D program is not reached before the end of the year, McDonnell undoubtedly will conclude this effort and shift their personnel to more productive projects.
